

About notification of shoes type equipment from purchase on April 1, 2018 by
notification of Ministry of Health, Labor and Welfare Insurance Bureau

It is now necessary to attach a photo of the brace that can be confirmed by the
patient to actually wear it.

“Shoe-type orthosis” is an orthosis that covers the foot and is intended for
treatment such as correction of deformities such as varus and valgus flat feet, and
reduction of pain and pressure concentration for advanced pathological deformities.
It is similar to shoes and shoes.

Those created for the convenience of daily life after symptom fixation are not
treatment equipment and are not eligible for payment.

[Notes on photos]

- (1) Please take a picture so that you can see the whole image of the treatment
equipment
- (2) All purchased treatment equipment including accessories are photographed.
- (3) If there is an insole (or other type of equipment to be inserted into the shoe), it
must be taken out of the shoe.
- (4) If there are logos, tags (size notation), product numbers, and manufacturer
notations, they must be photographed.

The purpose is to confirm whether the receipt and the actual equipment created are
the same.

We ask for your understanding and cooperation for proper insurance benefits.
